

### Upgrade any camera to include full parking sensor graphics

Switch between no graphics, subtle graphics, a complete overlay or even graphics only!

- The sensor overlay is designed to take the camera NTSC output and add a range of different sensor displays and warning sounds.
- It can be used with any aftermarket or OEM cameras and LCD panels (with suitable connectors).
- There are a range of on screen vehicles, graphics and warning tones to choose from.
- The sensor system used is the PDC-126. The most advanced system available with a range of setup options to suit any vehicle.
- The PDC-OSD is built to OEM requirement and includes a three year warranty.
